# Instructions for Video Submission

This document describes the requirements for the submission of the video for the 1<sup>st</sup> SARC-BARINET Design Competition. The submission deadline is September 15, 2021.

## 1 Content of the Video

The video should include a pitch of the idea, mission, or goals of the project being developed and presented in the competition, and any relevant information from the White Paper (including business case, scientific or engineering achievements, level of innovation), may be included in the short video. **The use of a single vehicle is required for the practical demonstration, which may be limited to part of the mission as well, is the scope is to wide for a practical demonstration of a full mission.** The participating teams may employ multiple vehicles for the practical demonstration, if desired..

The video for the practical demonstration should **highlight the key aspect of the mission**, and should not be more than 15 minutes long. It is to the discretion of the participating teams to include any additional information or data in the video, including but not limited to simulation cases with multiple vehicles, that they feel is relevant for the jury to fully assess the submission.

**Authors must remember that, like the White Paper, the videos will be accessible by all the Jury members as well as by all participants in the competition.**

## 2 Video Format

Videos must be encoded in a format that may be easily played using Windows Media Player or QuickPlayer (preferably both).

## 3 Submission Instructions

More information on the submission procedure will be provided during the first half of September, 2021.
